

**Amendments to the Specification:**

Please replace the paragraph beginning on page 4, line 22, with the following rewritten paragraph:

In the present uninterruptible power supply device, the limited discharge current of the storage battery, by controlling the output voltage of the converter to lower below the steady state, is almost constant what is equivalent to 10-50 % of the maximum current of the load. It is more preferred In an embodiment, the limited discharge current of the storage battery is controlled at a constant current of around 30 % of the maximum current of the load.
